

PROMI (DG-PROX)

Standalone access control

Range: Digiprox®

The PROMI500 (DG-PROX) range are compact proximity reader/controllers with the capacity of 500 & 1000 users respectively. The PROMI1000PC has the added feature of supplied software for connection to a PC to provide added functions.

Both units are constructed from sturdy polycarbonate, and have self-contained electronics for connection to the door lock and exit button.

For extremely harsh environments, external remote reader heads can be connected up to 50 metres away, to allow the reader controller to be installed in a secure location.

Simple programming via a master code allows for the adding and deleting of users and the setting of the lock time. The option is for CARD, CARD+PIN or PIN.

The PROMI1000PC includes 1000 events in memory, operating schedules, bank holiday management, anti-passback and an upload/download feature to ensure integrity of the database.

Optional remote reader (narrow style available)
